

PRANESWAR GANESAN

Application Developer Intern | Cloud-Native Backend | Generative AI Integrations

📞 9940810490 @ user@domain.tld 🔗 <https://www.linkedin.com/in/praneswar-g-8b0b47242/> 🔗 <https://github.com/PraneswarGanesan>

SUMMARY

Final-year **Computer Science & Engineering** student specializing in **cloud-native backend development** and **Generative AI integrations**. Hands-on experience **designing scalable services using Spring Boot, REST APIs, Docker, and AWS, with practical exposure to LLM-powered workflows and AI service orchestration**. Strong focus on system reliability, observability, performance optimization, and automation-driven engineering.

EXPERIENCE

Application Development Associate Intern

Accenture

📅 07/2025 - 07/2025 📍 Bangalore, India

- Engineered a full-stack employee management application using Spring Boot and React, implementing RESTful APIs and CRUD operations.
- Strengthened understanding of API lifecycle management, backend integration, and service-level communication patterns.
- Utilized Splunk Cloud Observability and ServiceNow for monitoring, logging, and workflow analysis.
- Documented application behaviors, performance insights, and operational workflows for internal evaluation.

PROJECTS

MeshOps – AI-Driven Cloud Deployment Platform

🔗 github.com/PraneswarGanesan/MeshOps

- Designed a cloud-native deployment platform enabling automated provisioning of containerized ML models and APIs.
- Developed backend orchestration layer using Spring Boot, integrating Docker-based isolation and service lifecycle controls.
- Implemented LLM-driven test generation for behavioral validation and runtime failure detection.
- Focused on scalability, observability, and real-time logging for distributed service environments.

BACKEND & GEN AI PROJECTS

🔗 github.com/PraneswarGanesan/AgentWeaver

AgentWeaver – AI Workflow Automation Engine

- Built an automation framework enabling AI-driven task chaining and service orchestration.
- Designed modular backend components for workflow execution and response handling.
- Explored LLM integration patterns and prompt-driven task execution.

Email Gemini Reply – AI-Assisted Communication Automation

🔗 github.com/PraneswarGanesan/email_geminireply

- Developed AI-powered email response system integrating Google Gemini API.
- Implemented backend logic for request handling, message processing, and response generation.
- Improved interaction efficiency through automated context-aware replies.

URL Shortener – Cloud-Ready Backend Service

🔗 github.com/PraneswarGanesan/url-shortner-praneswar-g

- Designed REST-based backend service for URL compression and redirection logic.
- Implemented persistence mechanisms and request validation workflows.
- Optimized routing efficiency and service reliability.

SKILLS

Programming Languages

Java, Python, JavaScript

Web Development

Spring Boot, React, RESTful APIs, CRUD operations

Databases

MySQL, PostgreSQL, MongoDB

Cloud DevOps

AWS (EC2, Lambda, S3, VPC, Route 53, RDS), Docker, CI/CD, Git

AI/ML Exposure

Integration of AI services (Google Gemini API), RabbitMQ for decoupled messaging

Version Control & Collaboration

Git, GitHub, Agile

Soft Skills

Problem Solving, UX Design, Innovation, Communication, Leadership

KEY ACHIEVEMENTS

✓ AI Deployment Enhancement

Developed platform enhancing model deployment speed by 40%.

✓ UI/UX Optimization Success

Improved app performance by optimizing animations, reducing render time by 20%.

✓ Error Page Redesign

Redesigned error pages, decreasing user bounce rate by 25%.

✓ Service Throughput Improvement

Implemented message queue, enhancing service interaction throughput by 35%.

CERTIFICATIONS

AWS Cloud Practitioner (781)

Amazon Web Services

Virtual Internship Certificate

Hewlett Packard Enterprises

PROJECTS

Morse Code Generator – Utility Automation Tool

- github.com/PraneswarGanesan/morsecodegen
- Developed lightweight backend logic for encoding workflows and transformation processing.
 - Demonstrated structured problem-solving and algorithmic design.

OPEN SOURCE & INDEPENDENT CONTRIBUTIONS

github.com/PraneswarGanesan/barabara

Barabara – UI/UX Modernization

- Enhanced interface structure, interaction flows, and visual consistency.
- Improved usability and rendering performance.

Finance Toolbox – System & Interface Improvements

- github.com/PraneswarGanesan/finance-toolboxmy
- Contributed refinements to UI behavior and workflow alignment.
 - Supported maintainability and user experience improvements.

DevConnect – Error Handling & UX Enhancements

- github.com/PraneswarGanesan/DevConnecttt
- Designed custom error management interfaces and response flows.
 - Applied responsive design principles and consistency improvements.

EDUCATION

B.E. Computer Science & Engineering

Sri Krishna College of Technology
